

NON-FICTION

HANS-JOACHIM ZILLMER

COLUMBUS WAS THE LAST ONE TO COME

WHEN GREENLAND WAS GREEN:
HOW CELTS AND VIKINGS POPULATED AMERICA

WERE THE INCA RULERS VIKINGS?

"THIS BOOK SHAKES THE PILLARS OF OUR HISTORIC KNOWLEDGE." *PROF. DR. WOLFGANG KUNDT*

In his new book Hans-Joachim Zillmer presents astonishing findings and amazing insights. Vikings populated Greenland when it was still green. Normans imported Brazil wood. Christians travelled to South America and through the Magellan Strait into the Pacific Ocean long before Columbus. Do world-wide megaliths, signalling towers and the network of broad causeways, which connect the Mayan cities, testify of common roots? Why were the Incas often light-skinned and blond? During his elaborate travels Zillmer made sensational discoveries. Those interested in the mysteries of human history won't be able to withdraw from the fascination of Zillmer's patterns of interpretation.
